# EDUCATION, MOVING FORWARD TOWARDS THE 22<sup>ND</sup> CENTURY

---

# Student Matriculation

---

Desire for one to seek further knowledge... how does computer use fit into this picture?

# Teaching for the 22<sup>nd</sup> Century

---

What lies in the future regarding technology?

Facts:

- By 2020 artificial intelligence will be part of mainstream society
- Speaking to another person on the phone will become obsolete due to the implementation of an “intelligent assistant” enabling users of iPhone, iPad, & iTouch

# Teaching for the 22<sup>nd</sup> Century

---

The Internet is still evolving to include tools that can be used between people all over the world such as;

- Acapela – [www.acapela-group.com](http://www.acapela-group.com)  
(watch video)

- Allows learners to thrive on their own
- Learners are provided a learning environment conducive to their acquisition of knowledge
- Shifting towards a learning centered environment

# Emerging Trends

---

The Focus is on Education

ADD A FOOTER

# Technology Advancement

---

Teachers are responsible for the implementation of new strategies and techniques.

# 2019 Technology Trends Are Here

---

Trends include mobile devices, wearable technology, cloud computing, collaboration computing, Robotics, Augmented Reality and STEM Technology, Flipped Classroom.

A scenic landscape featuring a river flowing through a rocky area with evergreen trees and mountains in the background under a clear blue sky. The image has a blue-to-green color gradient overlay.

# Mahalo!
